

# BACKUP AS A SERVICE

PROTECT YOUR MISSION CRITICAL DATA WITH A FULLY MANAGED, SECURE AND SCALABLE DATA PROTECTION PLATFORM.

Harbor's Backup as a Service (BaaS) makes it simple to protect against data corruption, data loss and security incidents such as ransomware. Using market-leading backup technology and expert engineers, we deliver a fully managed service that allows customers to focus on delivering value and service improvement into their business.

Protecting valuable data across a wide array of platforms is becoming increasingly more complex and time consuming. We help organisations offload the management and support of backup by providing the technology, tools and expertise to responsibly and securely manage customers data.

## KEY BENEFITS

### OPEX Based Model

BaaS makes it easy to efficiently scale up backup services without being restrained by CAPEX demands

### Choice of Backup Locations

Customers can choose where to store their data, whether this is leveraging the public cloud such as AWS and Azure or having data backed up to our UK based datacentres

### Secure Access and Permissions

Gain complete piece of mind with secure and delegated access rights and permissions

### Immutable backups

All applications and data are stored in an immutable format, preventing ransomware from ever accessing and encrypting backups

### 24x7x365 Support

24x7x365 support for any issue, from an individual file restore to full server restoration

### O365 Backup

Securely back up all aspects of Office365 including Sharepoint, One Drive and Teams

# WHY CHOOSE HARBOR?

## Trusted Partner

Our team of expert data recovery specialists are trusted by market leading enterprises

## Secure & Scalable Platform

Our data protection platform grows with our customers and scales to meet their businesses future needs

## Market-leading Technologies

Combining industry leading technologies with our innovative processes to deliver a reliable and trusted BaaS solution

## Fully Outsourced Solution

From initial setup to ongoing operations, we monitor and manage customers backup with regular reporting, providing full visibility into the solution

“By 2021, 50% of companies will augment or replace their current backup application with another solution”

 GartnerGroup

## Passionate
