

CLOUD OPTIMISATION SERVICE

POWERED BY **CloudHealth**

Harbor's Cloud Optimisation Service gives customers visibility of their AWS and/or Azure infrastructure through an intuitive and graphical portal. This allows customers to Visualise, Report, Optimise and see Recommendations on elements of their Cloud environment, notably Cost, Utilisation and Security.

80% will overshoot their cloud IaaS budgets

50% will accidentally expose data or services

47% do not optimise cloud workloads

USING THE CLOUD OPTIMISATION SERVICE, CUSTOMERS CAN:

- Drive accountability with visibility across multiple clouds with line of business chargeback
- Reduce costs by on average **25%** with actionable recommendations
- Easily manage Reserved Instances
- Right-size infrastructure components across distributed environments
- Stay ahead of cloud security risks to prevent exposure and maintain compliance
