

PROTECT CRITICAL WORKLOADS WITH A RELIABLE AND ROBUST

# DISASTER RECOVERY SERVICE

Immediately respond to the worst-case scenarios and protect your data from downtime with our disaster recovery as a service (DRaaS). Our intuitive cloud-based portal enables you to test Disaster Recovery with zero impact on your production systems and leverage leading Cloud providers including Microsoft Azure and Amazon Web Services (AWS).

From a single console, customers can gain complete control over their organisations sites and can easily recover from ransomware, corruption or natural disasters. Our team of experienced engineers are available 24x7 to support live invocations in a disastrous situation, scheduled tests or general enquiries.

## KEY BENEFITS

### Ease of Management

Single unified interface for data protection policy management, SLA monitoring and service level reporting for executive management and governance

### Continuous Data Protection

Continuously capture and track data modifications so you can restore back to any point in time with remarkable granularity

### Journal-Based Recovery

Every change made is automatically written into a journal with a granularity of seconds, enabling recovery to a point in time immediately before an incident

### Non-Disruptive Testing

Validate recoverability or test against production replicas, all with no production or protection impact with assistance from our DR consultants

### Simplified Fail-Back Processes

Our highly trained team will be available to reverse replication, fail-back to your environment and help you return to business as usual after a disaster

### Hybrid and Multi-Cloud

Protect and migrate workloads to, from and between clouds without production impact for Azure, AWS and more. Maintain visibility across your multi-site, multi-cloud environment without extra software to install or support

# WHY CHOOSE HARBOR?

## Trusted Partner

Our team of expert data recovery specialists are trusted by market leading enterprises

## Secure & Scalable Platform

Our data protection platform grows with our customers and scales to meet their businesses future needs

## Market-leading Technologies

Combining industry leading technologies with our innovative processes to deliver a reliable and trusted DRaaS solution

## Fully Outsourced Solution

From initial setup to ongoing operations, we help customer with regular testing, 24x7 support in case of a real-life DR scenario or general enquiries

**93% of companies without Disaster Recovery who suffer a major data disaster are out of business within 1 year**

## Passionate

Our team are dedicated to making customers successful, whether that's helping with scheduled testing or in the event of a real-life DR scenario

## Collaborative

Using cutting edge technology, we help customers understand how to translate new innovations into real results for their organisation

## Innovative

We take the time to truly understand our customers, integrate into existing teams, and find new ways to protect business critical data

## Trusted

Combining years of experience and a strong track record of success, we help customers to design, implement and manage data protection platforms
