

RUBRIK FOUNDATION

TRANSFORM YOUR BUSINESS WITH THE POWER OF RUBRIK'S AWARD WINNING TECHNOLOGY, COUPLED WITH OUR OUTSTANDING MANAGED SERVICE

Working closely with Rubrik, Harbor have developed a Cloud Data Management platform to provide customers with one solution for instant recovery, search, development and cloud with game changing results. Our platform is suitable for customers of any size, bringing the Award Winning technology of Rubrik to the wider market.

With IT teams under increasingly more pressure to deliver on competing objectives, our aim was to provide the benefits of next-generation data management without adding to customer workload.

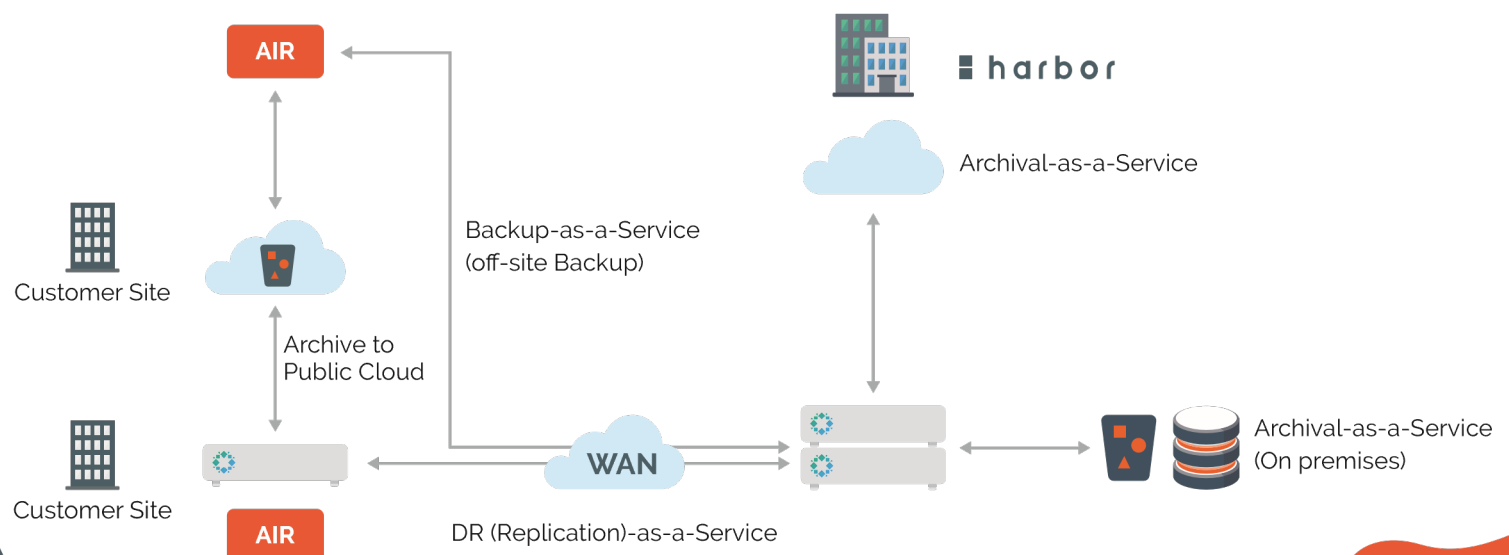

Harbor's solution provides a simple, fully monitored and managed, turnkey appliance with data replicated offsite to a secondary location, ensuring availability and durability of customer data at all times.

FEATURES AND BENEFITS

Remotely Monitored and Managed Appliance	✓
30 Day Onsite Retention	✓
Offsite Data Protection	✓
Instant Search and Recovery	✓
Consumption Model	✓
24x7 Expert Support	✓
Backed by a Forrester Wave Leading Vendor	✓

HOW DOES IT WORK?

RUBRIK PLATFORM BENEFITS

Radar

Mitigate risks and increase resiliency against ransomware. Identify anomalous activity and recover faster from security attacks with deeper intelligence on threat behavior and impact.

Office 365 Backup

Protecting Office 365 is easy, while delivering powerful performance, cost efficiencies, and scalability — all with unprecedented elegance and simplicity, from setup to management.

Instant Search

Deliver near-zero RTOs with predictive search. Locate VMs, physical databases, applications, or files, whether the data resides on-premises or in the cloud.

Policy Driven

Rubrik wipes out management complexity with just a few clicks through a single policy engine that orchestrates service level agreements (SLAs) across the entire data lifecycle. Automate management across hybrid and multi-cloud environments with one programmatic interface.

Security & Compliance

Data is secured in-transit and at-rest throughout its lifecycle, regardless of location. Rubrik delivers granular role-based access control while automating compliance reporting to successfully complete various industry and internal audits. Recover quickly from ransomware from immutable backups native to the platform.

API-First and Cloud-Scale Architecture

Rubrik is a vendor-agnostic platform that is built on an API-first architecture. Leverage our powerful suite of APIs to integrate seamlessly with third party services. Rubrik is purpose-built for cloud integration and infinite scale to enable hybrid cloud for all enterprises.

Harbor's Rubrik Foundation service brings the power of Cloud Data Management to the SME sector in a simple and cost effective solution

Supports industry-leading applications, operating systems, databases, hypervisors, cloud and SaaS applications
